Subject: Microsoft settlement...

Dear Justice Department,

I do realize that government and big business skip merrily down the road at most consumers expense, but don't you realize that making MS give schools THEIR proprietary hardware instead of money is in fact GIVING THEM MORE BUSINESS DOWN THE ROAD? The schools affected (or donated to, as you put it) will then be forced to buy all the upgrades and software updates for the MS systems, as opposed to spending the money where it could be needed or choosing their own computer systems, Mac, linux.. You know, Microsoft's competition, which has been illegally conspired against by Microsoft, which is why they are in court!! Ahem!

Just a thought...

Gail M. Knowles (taxpayer, voter, mom)
